

Worm painting and Spider web craft from Ms Griffiths

Family Fun!

Here are some activity ideas for all members of the family to enjoy

Icy Insects!

Place small plastic toys such as insects, minibeasts, dinosaurs etc. into a freeze-able container. Fill with water and leave overnight. Have fun removing them using tools, salt and warm water.

Spiderweb Tag

This game starts like any other game of tag, but it has an insect-themed twist. Select a player as the spider, and all the rest of the family are flies. When the spider tags a fly, that fly then gets caught in the spider's web. The spider and caught fly hold hands and chase after more flies. Each time a fly is caught, the hand-holding forms a larger web. Continue until only one player remains.

Worm Painting!

Simply cook some spaghetti, drain it and wait for it to cool. Dip it into paint and drag it across the paper. You can bounce, twirl and whirl the spaghetti to make wonderful patterns and shapes.

Spiderweb Craft

Staying on the Spider theme....Collect some small sticks from the garden or on your daily walk. You can use, string, wool or twine to fix them together and weave a spider web!
