Roll a pair of dice. Add the total of the dots on the two dice. Colour that space on the dinosaur that matches the total number of dots on the face of the dice. The first one with their entire page coloured is the winner.

I can add together two numbers

*I can recognise odd and even numbers*
*I can recognise patterns*
*I can add two numbers*

# Dinosaur Maths Problems

**Choose 2 even numbers and add them together. What do you notice?**

- Try this with different even numbers.

  2   4   6   8   10   12   14   16   18

- Does this always happen?
- Why does this happen?

**What happens when you add and odd and an even number together?**
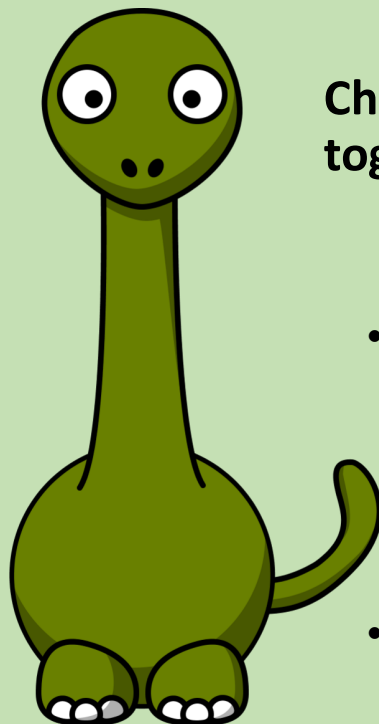

2  3  4  5  6  7  8  9  10  11  12  13

**Challenge**
22  33  24  26
62 59
23  35
24  37  18

Does this always happen?
Why does this happen?

**Add together the numbers,**

## 2,4,6,8,10

What is the total?
Can you find a quick way to do this?

**Choose 2 odd numbers and add them together. What do you notice?**

- Try this with different odd numbers.

## 3,5,7,9,11

- **Challenge**: 13, 23, 41, 27, 19

Does this always happen?
Why does this happen?
