

Reception : Mathematical Development

From now until the Summer Break, we will be doing our MD work from one of three stories, depending on your year group. Each story will lend itself to a theme and a variety of maths activities will be completed each week.

Reception : Max's Jungle Adventure

This week, we will be concentrating on ordering numbers, correct number formation and additions.

I can..... say numbers up to 15, forwards and backwards.

I can..... do this starting from different numbers.

I can..... compare and order numbers up to at least 10

I can..... count up to 8 and get it right every time

I can..... read and write numbers up to at least 9

I can..... join two groups of things to find 'how many altogether?'

We will do introductions in class and three activities will be sent home in the 'pack'

I can order my numbers correctly I can form my numbers correctly Use the number line to practise writing your numbers in the correct order.

Ways of making numbers to 5

How many different ways can you make 5? Add spots on to the ladybird wings.

The first one could be.... $4+1 = 5$

Draw 4 spots on one wing then 1 spot on the other wing. 5 spots altogether.

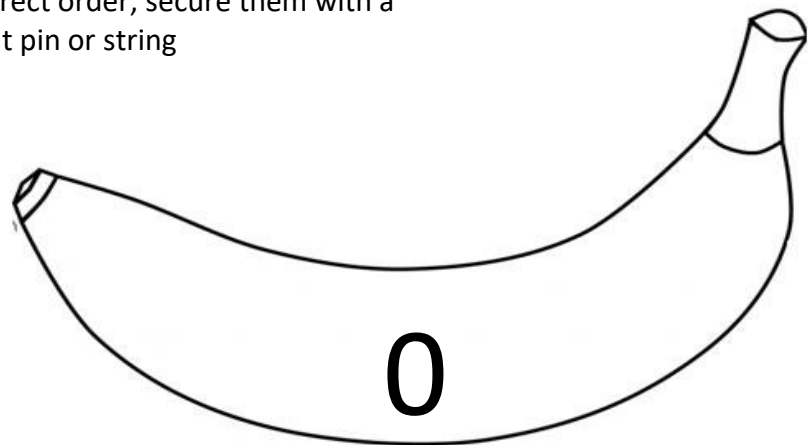

How else could you make 5 spots?

I can make a banana fan

I can order my numbers to at least 10

Begin by numbering the bananas from 0-10. Cut out and create your own banana fan by adding your numbered bananas in the correct order, secure them with a split pin or string

I can listen to instructions and order the pictures

I can follow the instructions to make my own banana sandwich

Complete the instructions by cutting out and adding the correct pictures, then make your own sandwich and enjoy.

1. First, get two slices of bread.
2. Next, use the knife to spread some butter onto both slices.
3. After that, use a knife to cut the banana into pieces
4. Then, put the pieces of banana on the bread
5. Then, put one slice of bread on top of the other, to make a sandwich.
6. After that, cut the sandwich in half with the knife.
7. Finally, eat it!
